Senior Full-Stack & Frontend Engineer with 5+ years of experience leading the architecture and delivery of high-performance web applications, headless eCommerce, and cross-platform solutions. Specialist in the React/Next.js/TypeScript ecosystem with hands-on expertise in Cloud infrastructure (AWS/Cloudflare), custom CI/CD pipelines, and AI integrations. Proven track record of spearheading technical shifts, driving up to 50% performance gains, and optimizing conversion rates.

WORK EXPERIENCE

Kreitech **Austin, Texas**
Frontend Engineer *November 2025 - Present*

- End-to-End Frontend Ownership & Architecture: Led the complete frontend lifecycle for complex web applications targeting the U.S. market, from initial design and API integration to deployment and long-term maintenance using TypeScript, React, and Next.js.
- Full-Stack & Mobile Engineering: Actively developed backend services (Node.js/Hono/Supabase) and single-handedly built mobile applications leveraging modern BaaS architectures, ensuring seamless cross-platform performance.
- DevOps & CI/CD Optimization: Drove technical discussions within a Scrum team to improve deployment reliability; architected robust CI/CD workflows using GitHub Actions and Git Hooks, reducing integration friction and streamlining sprint releases.
- AI-Driven Tooling & Innovation: Partnered with the internal AI engineering team to design, integrate, and deploy AI-powered tools and features with the Vercel AI SDK, the Claude API and MCP integrations.

3dids **Valencia, Spain**
Front-End Consultant *May 2024 - May 2025*

- End-to-End Shopify Ownership: Led full-lifecycle development of custom Shopify eCommerce stores, architecting custom Liquid themes and deep back-office integrations tailored to client business needs.
- Headless Commerce Pioneer (Hydrogen): Spearheaded the adoption of Shopify Hydrogen (React/Next.js) within the agency to deliver hyper-customized, high-performance headless eCommerce experiences.
- Architecture & DX Framework: Co-created an internal agency framework and boilerplate focused on Developer Experience (DX), standardizing best practices, accelerating delivery timelines, and improving site scalability.

Doctec World **Marbella, Spain**
Tech Lead *August 2022 - January 2024*

- End-to-End Technical Ownership: Directed full-lifecycle engineering for a diverse portfolio of products—including eCommerce stores, SaaS applications, and internal tools—with total autonomy over architecture and stack selection (Next.js, Vite/React, Astro, React Native).
- Cloud Infrastructure & Custom CI/CD: Configured and managed production cloud infrastructure on AWS (EC2, ECS, RDS, S3), Cloudflare and dedicated VPS, designing custom CI/CD pipelines.
- Complex Integrations & Payments: Engineered tailored third-party integrations, headless CMS setups, and secure payment gateway pipelines adapted to custom business logic and scalability requirements.
- Technical Growth & Performance: Combined advanced technical SEO, analytics, and automation workflows with performance optimizations, driving measurable traffic growth and CRO improvements across client platforms.

Desoft **Havana, Cuba**
Jr Front-End Developer *July 2020 - August 2022*

- Pioneered Modern Frontend Adoption: Led the transition from legacy stacks (PHP, WordPress) to React, establishing modern UI workflows that accelerated development speed and raised visual quality standards.
- Custom Software & Internal Tools: Designed and developed custom web applications, internal tools for Cuban state departments, and proprietary enterprise software tailored to diverse business clients.
- Architecture & Bug Reduction: Implemented core design patterns and architecture principles in React, Next.js, and TypeScript, improving codebase maintainability and reducing visual bugs by 40%.
- Cross-Technology Adaptability: Integrated diverse technologies—including C# modules, Node.js, Express, and Linux/VPS server management—to build end-to-end features and optimize team delivery workflows.

EDUCATION

Universidad de la Habana **Havana, Cuba**
Bachelor's Degree in Cybernetics | 3 years completed *2014 - 2017 (Cuba)*

Instituto Politécnico de informática "Martires de Giron" **Havana, Cuba**
Technical Degree in Computer Science *2006 - 2009 (Cuba)*

CERTIFICATIONS

- Responsive Web Design (freecodecamp.org)
- Javascript Algorithms and Data Structure (freecodecamp.org)
- Front End Development Libraries (freecodecamp.org)
- Data Visualization (freecodecamp.org)

- Back Development and APIs (freecodecamp.org)
- Graph Developer - Associate (Apollo Graphql)

TECHNICAL SKILLS

Frontend & Mobile	React (Hooks), Next.js, TypeScript, JavaScript (ES6+), Redux, Zustand, TanStack Query, Vite, Webpack, Astro, React Native, Tailwind CSS, Liquid, Hydrogen, HTML5/CSS3 (Styled Components)
Backend & Databases	Node.js, Express, Nest.js, Hono, Supabase (Edge Functions, cron jobs), background jobs and queues, GraphQL (Apollo), REST APIs, SQL, PostgreSQL
DevOps & Cloud	CI/CD (GitHub Actions, Git Hooks), AWS (EC2, ECS, RDS, S3), Docker, Cloudflare, Vercel, VPS, Bash, Linux
Testing & Tools	Vitest, Jest, Git, Vite, Web performance (Core Web Vitals), Technical SEO, Agile (Scrum)
AI & LLM	MCP integrations, Vercel AI SDK, Claude API (Anthropic SDK), AI agents in development workflows

LANGUAGES

- Spanish (Native)
- English (C1)

OPEN SOURCE

- Comercify (author): npm package of 21 typed, dependency-free eCommerce utilities with a copy-to-project CLI; 90 tests, signed releases
- Forge (author): Next.js 15 + Appwrite workspace management boilerplate with roles, projects and tasks; Hono API, CI
- Contributions merged into Starwind UI (757★) and tiptap-shadcn
